

# What's next for Bluetooth in PulseAudio?

Sanchayan Maity

[asymptotic.io](https://asymptotic.io)

# What is PulseAudio?

- Initial release on 17 July 2004

# What is PulseAudio?

- Initial release on 17 July 2004
- First appeared for users in Fedora Linux with version 8

# What is PulseAudio?

- Initial release on 17 July 2004
- First appeared for users in Fedora Linux with version 8
- Features?

# What is PulseAudio?

- Initial release on 17 July 2004
- First appeared for users in Fedora Linux with version 8
- Features?
  - Audio mixing

# What is PulseAudio?

- Initial release on 17 July 2004
- First appeared for users in Fedora Linux with version 8
- Features?
  - Audio mixing
  - Per application volume controls

# What is PulseAudio?

- Initial release on 17 July 2004
- First appeared for users in Fedora Linux with version 8
- Features?
  - Audio mixing
  - Per application volume controls
  - Multiple sources and sinks

# What is PulseAudio?

- Initial release on 17 July 2004
- First appeared for users in Fedora Linux with version 8
- Features?
  - Audio mixing
  - Per application volume controls
  - Multiple sources and sinks
  - Combine multiple sound cards and synchronize multiple playback streams

# What is PulseAudio?

- Initial release on 17 July 2004
- First appeared for users in Fedora Linux with version 8
- Features?
  - Audio mixing
  - Per application volume controls
  - Multiple sources and sinks
  - Combine multiple sound cards and synchronize multiple playback streams
  - Bluetooth support

# Bluetooth Codecs

- Available codecs?

# Bluetooth Codecs

- Available codecs?
  - Low-complexity subband codec (SBC)

# Bluetooth Codecs

- Available codecs?
  - Low-complexity subband codec (SBC)
  - Audio Processing Technology (aptX, aptX-HD)

# Bluetooth Codecs

- Available codecs?
  - Low-complexity subband codec (SBC)
  - Audio Processing Technology (aptX, aptX-HD)
  - Advanced Audio Coding (AAC)

# Bluetooth Codecs

- Available codecs?
  - Low-complexity subband codec (SBC)
  - Audio Processing Technology (aptX, aptX-HD)
  - Advanced Audio Coding (AAC)
  - LDAC

# So which is better?

HOW STANDARDS PROLIFERATE:  
(SEE: A/C CHARGERS, CHARACTER ENCODINGS, INSTANT MESSAGING, ETC.)

# Current State

- Upstream only supports SBC :(

# Current State

- Upstream only supports SBC :(
- HSP/HFP support

# Current State

- Upstream only supports SBC :(
- HSP/HFP support
- Out of tree community effort with pulseaudio-modules-bt

# Challenges

- Codec switching

# Challenges

- Codec switching
- Patent encumbered licenses?

# Challenges

# GStreamer

- What is GStreamer?

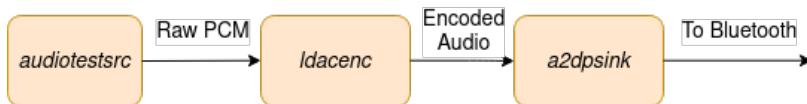

# GStreamer

- What is GStreamer?
- Why?

# Example Pipeline

```
gst-launch-1.0 -v audiotestsrc !  
audio/x-raw,rate=44100,channels=2,format=S32LE !  
ldacenc eqmid=2 ! a2dpsink  
transport=/org/bluez/hci0/dev_4C_BC_98_80_01_9B/sep10/fd0
```

# Progress so far

- LDAC support upstreamed in GStreamer

# Progress so far

- LDAC support upstreamed in GStreamer
- Support for Low-Overhead MPEG-4 Audio Transport Multiplex (LATM) AAC in GStreamer

# Progress so far

- LDAC support upstreamed in GStreamer
- Support for Low-Overhead MPEG-4 Audio Transport Multiplex (LATM) AAC in GStreamer
- GStreamer wrapper around *libopenaptx*. Work done by Igor Kovalenko.

# Progress so far

- LDAC support upstreamed in GStreamer
- Support for Low-Overhead MPEG-4 Audio Transport Multiplex (LATM) AAC in GStreamer
- GStreamer wrapper around *libopenaptx*. Work done by Igor Kovalenko.
- Implementing codec switching

# Progress so far

- LDAC support upstreamed in GStreamer
- Support for Low-Overhead MPEG-4 Audio Transport Multiplex (LATM) AAC in GStreamer
- GStreamer wrapper around *libopenaptx*. Work done by Igor Kovalenko.
- Implementing codec switching
- Proof of concept with GStreamer tested

# Progress so far
